130. A DENEGATE report (9801, 9 November 1952), entitled "Activity of Prof. Nikolaj MAXIMOV", discussed the reestablishment of the German Service, probably in contact with or supported by the U.S. Service in Italy, and making use of the collaboration of Carl HAAS and Otto GRIESSER: "There is in course an attempt at provocation and penetration of Otto GRIESSER by means of an agent of this Center. In any case, I am in accord with the TACU Center (i.e., of the 'R' Office) which already has such a penetration on the way to realization via Prof. MAXIMOV, for the continuation in course of direct and fiduciary observation action."
